

Consolidating the media in the hands of few large corporations can lead to the kind of practice that Sinclair is embarking upon in this election year with their airing of the anti-Kerry election ad under the ruse of commentary! This practice of bias in media coverage, and slanting, as well as narrowly focusing information flow so that overtime the public is no longer aware that they are not getting the complete picture is dangerous and threatens our democracy!

The FCC is charged with the responsibility of exercising regulatory authority of companies such as Sinclair. Step up to the plate at this critical juncture in American politics and fine Sinclair or threaten to revoke their license to operate if they decide to move forward with this broadcast.
